

## Chiropractor Job Description

### Job Overview

Here at Riverwalk Family Chiropractic, we pride ourselves on providing a family friendly atmosphere to our patients and staff. We are looking toward hiring an experienced Chiropractor to help us keep growing and bring their own set of specialty techniques to the facility. If you are dedicated, ambitious, and feel this type of environment will fit your work needs; RFC is an excellent place to grow your career. Please apply today, we look forward to meeting you.

### Responsibilities for Chiropractor

- Perform intake assessments by listening to patient concerns and reviewing medical records
- Physically examine patients by testing their reflexes and posture
- Record patient data and keep detailed records of every treatment session
- Use chiropractic techniques to diagnose neuromusculoskeletal conditions
- Perform skeletal adjustments to relieve pain within a patient's body
- Use massage therapy techniques to reduce tension within a patient's muscles and help restore mobility
- Consult with patients and offer techniques and ideas for them to improve their physical health and comfort
- Refer patients to see other types of specialists when necessary

### Qualifications for Chiropractor

- Our ideal candidate possesses 3+ years of experience
- Prior experience working in a private practice setting is preferred
- Excellent interpersonal skills are essential in order to build relationships with patients
- Superior time management skills and the ability to juggle a large patient load
- Ability to empathize with patients who are in chronic pain and a strong desire to help improve their quality of life
- Must be able to think critically and make judgements about how best to help patients
- Strong communication skills and the ability to work as part of a close-knit team
- Up to date on the latest chiropractic practices and a desire to provide cutting-age care
- Must be in good physical condition and have the dexterity and strength to perform adjustments and manipulations on patients

### Skills

- Interpersonal Skills: Ability to form relationships with clients to make them comfortable and receptive to therapy and to build a strong client base.
- Empathy: Willingness to listen to clients' symptoms and respond sympathetically to clients' needs.
- Motor skills and dexterity: Strength and agility to apply adjustments to the spinal column and other joints of the body.
- Decision-making: Knowledge to assess and create a plan of treatment for their patients and recommend other health care professionals if patient needs exceed the scope of practice.

### Additional Modalities a Plus

- Bring additional specialty techniques to the practice that are beyond formal chiropractic education.
- Present an attitude of life-long learning for personal and professional gain.
